

Case Study: Australia based SEO company outsourced one-way deep linking project to secure high rankings for his clients

Services Delivered:

Outsourced article writing and article directory submission for over fifty projects

Client:

David Touri
Search Engine Marketing Specialist
<http://www.SEOSydney.com.au>

URL:

Various client websites (names cannot be mentioned due to privacy constraints)

Scenario:

David was looking for an SEO outsourcing partner who can create deep anchor text links for his various client websites. He located Submit2Please on Google and sought professional services for the same.

Actions Taken:

We suggested David to get a set of articles written and submitted to article directories as they provide quality deep links to a site. He then asked us to write and submit **Fifty (50)** articles for his various projects.

At first our expert in-house content writers wrote fifty articles on behalf of David and all fifty articles were sent to him for his approval. Upon approval, our submission team submitted those articles to three hundred article directories.

Ultimate Outcome:

David got one-way deep links with desired anchor texts which increased link popularity of his sites (of his customer). Consequently, all his sites got high rankings in the search results of major search engines.

Client Feedback:

David Touri was very happy and contented with our service and now he is one of our premier customers. Here is his testimonial –

“I have been using Indus Net for 2 years on and off. They have provided me with great pricing and a reliable service when a job was needed to be done. Thank you!”
